Contents

1	Real Numbers	3
1.1	Basic properties	3
1.2	The set of real numbers	9
1.3	Absolute value and bounded functions	16
1.4	Intervals and the size of \mathbb{R}	20
1.5	Decimal representation of the reals	23
2	Sequences and Series	28
2.1	Sequences and limits	28
2.2	Facts about limits of sequences	37
2.3	Limit superior, limit inferior, and Bolzano–Weierstrass	48
2.4	Cauchy sequences	58
2.5	Series	61
2.6	More on series	73
3	Continuous Functions	84
3.1	Limits of functions	84
3.2	Continuous functions	93
3.3	Min-max and intermediate value theorems	100
3.4	Uniform continuity	107
3.5	Limits at infinity	113
3.6	Monotone functions and continuity	117
4	The Derivative	122
4.1	The derivative	122
4.2	Mean value theorem	128
4.3	Taylor’s theorem	137
4.4	Inverse function theorem	141
5	The Riemann Integral	145
5.1	The Riemann integral	145
5.2	Properties of the integral	154
5.3	Fundamental theorem of calculus	162
5.4	The logarithm and the exponential	168
5.5	Improper integrals	174
